Trading Pairs

You will be able to trade Enjin Coin(ENJ) with Ethereum(ETH) on Etherdelta

- [ENJ/ETH](#)

1. Getting an ERC20 compatible ETH wallet

You will need an ERC20 compatible ETH wallet to store your ENJ tokens. The compatible wallets we recommend are: Coinomi (Android), MyEtherWallet (Web), MetaMask (PC), Mist (PC), Parity (PC) and imToken (iOS & Android). If you are using any other wallet, make sure to check that they support all ERC20 token or that you have access to the private key (for exporting to a compatible wallet).

Here is our guide on how to create your wallet on MyEtherWallet:

2. Acquiring Ethereum (ETH) or Bitcoin (BTC)

You can purchase ETH with fiat currencies such as USD, Renminbi, etc., on any of the well-known cryptocurrency exchanges, such as:

- <https://www.coinbase.com/>
- <https://www.kraken.com/>
- <https://poloniex.com/>
- <https://cex.io/>

You may need to provide proof of ID and proof of address before buying.

Once you have brought ETH, you can send these to your ETH wallet or straight to your EtherDelta exchange wallet once you have registered.

Purchasing Bitcoin is similar but you will need a Bitcoin wallet instead of an Ethereum wallet.

3. Import your own wallet account onto your EtherDelta account

Go to <https://etherdelta.com> and, at the top, press the 'Import Account' button to import your wallet that contains ETH
